Journal of Fluid Mechanics Volume 439 **25 July 2001**

M. Braza, D. Faghani & H. Persillon	Successive stages and the role of natural vortex dislocations in three-dimensional wake transition	1
Y. Kimura & J. R. Herring	Gradient enhancement and filament ejection for a non-uniform elliptic vortex in two-dimensional turbulence	43
H. Qiao & J. H. Duncan	Gentle spilling breakers: crest flow-field evolution	57
P. K. Stansby & R. C. T. Rainey	On the orbital response of a rotating cylinder in a current	87
J. M. Lopez, F. Marques & J. Sanchez	Oscillatory modes in an enclosed swirling flow	109
Y. Andreopoulos & A. Honkan	An experimental study of the dissipative and vortical motion in turbulent boundary layers	131
P. Ehrhard	Laminar mixed convection in two-dimensional far wakes above heated/cooled bodies: model and experiments	165
S. Toll	A solution technique for longitudinal Stokes flow around multiple aligned cylinders	199
S. F. Tardu	Active control of near-wall turbulence by local oscillating blowing	217
T. J. Bridges	Transverse instability of solitary-wave states of the water-wave problem	255
C. Pasquero, A. Provenzale & A. Babiano	Parameterization of dispersion in two-dimensional turbulence	279
Z. Yang & P. R. Voke	Large-eddy simulation of boundary-layer separation and transition at a change of surface curvature	305
S. J. Hulshoff, A. Hirschberg & G. C. J. Hofmans	Sound production of vortex–nozzle interactions	335
G. E. Cossali	An integral model for gas entrainment into full cone sprays	353
D. Lee & H. Choi	Magnetohydrodynamic turbulent flow in a channel at low magnetic Reynolds number	367
A. E. Perry, S. Hafez & M. S. Chong	A possible reinterpretation of the Princeton superpipe data	395
R. Govindarajan & R. Narasimha	Estimating amplitude ratios in boundary layer stability theory: a comparison between two approaches	403
